HTML/CSS, JS and SQL

# Diego E. Salazar

Senior/Staff Software Engineer · AI & LLM product engineering · Full-stack + data platforms · Former VP of Engineering
New York, New York, United States

## Summary

I build AI-powered products and the platforms underneath them, from hand-written HTML/CSS and React UIs to the infrastructure, data pipelines and databases behind them. I've been writing software for 20 years, both as a hands-on senior/staff engineer and as a VP of Engineering.Recent work:• Sony Music: designing full-stack systems on AWS (React SPAs, ECS/Lambda, Aurora, Terraform, Jenkins) and re-architecting a sales-matching system to scale from gigabytes to terabytes.• Bloomberg Law: lead engineer on AI-powered legal document analysis, shipping GPT/LLM features in standalone apps and Microsoft Word add-ins on serverless AWS backends.• Kipu Health: VP of Engineering at a healthcare SaaS company, growing the team from 3 to 20 engineers and setting the architecture, policies and remote practices it scaled on.I also build my own AI tooling, like AiSyncing, an open-source tool that backs up AI assistants' memories and configs every day.I'm at my best owning ambiguous problems end to end: untangling coupled systems, choosing a pragmatic architecture, and making the team around me faster. I've mentored interns and bootcamp students along the way, and I'm fluent in English and Spanish.

## Experience

### Sony Music Entertainment

Senior Software Engineer
April 2025 - Present (1 year 8 months)
United States

Senior engineer on Sony Music's PDE engineering team, designing and owning full-stack systems on AWS, from SPA frontends to the database layer.

• Re-architected the sales-matching system to scale from gigabyte- to terabyte-scale data volumes.
• Designed and architected full-stack systems spanning React SPA frontends, ECS- and Lambda-based backends, and Aurora MySQL/MariaDB databases.

• Defined all infrastructure in Terraform, deployed through strict Jenkins pipelines and GitHub Actions workflows.
• Identified and broke apart tightly coupled systems, simplifying the architecture and speeding up developer workflows.

Stack: TypeScript, Python (typed, mypy), React, Bash, HTML/CSS, AWS (ECS, Lambda, Aurora MySQL/MariaDB), Terraform, Jenkins, GitHub Actions.

### Bloomberg Law
Senior Software Engineer
October 2018 - March 2025 (6 years 6 months)
New York, New York

Full-stack engineer on Bloomberg Law's Web Products team, then lead engineer on a new product team building AI-powered legal document analysis, owning architecture, UI/UX and APIs.

• Built GPT/LLM-powered document analysis features, shipping rich, responsive UIs in standalone apps and inside Microsoft products.
• Built Microsoft Word add-ins with Office.js, bringing document analysis into lawyers' existing workflow.
• Led architecture and implementation of serverless backends on AWS API Gateway and Lambda, with React and Vue SPAs on CloudFront and S3.
• Lead engineer for infrastructure as code (Terraform, CDK) and CI/CD on GitHub and GitLab; decoupled frontend and backend releases with CDN-based SPA deploys.
• Planned and led the migration from Rails-rendered pages to a Vue SPA backed by a JSON API.
• Mentored interns and onboarded them to the Bloomberg Law stack; interviewer on the Diversity & Inclusion recruiting team.

Stack: TypeScript, React, Vue, Node.js, Ruby on Rails, Java, Python, PostgreSQL, Redis, AWS.

### Trilogy Education
Coding Mentor
January 2019 - January 2022 (3 years 1 month)

Mentoring web development bootcamp students.

### Kipu Health
Vice President of Engineering

September 2013 - September 2018 (5 years 1 month)
Miami, FL

Served as a lead architect on software projects for the SAAS-based healthcare software company. Provided leadership and guidance to a small team of software engineers that grew to ~20. Continuously researched and applied latest industry tools and processes. Performed code reviews and lead pair programming sessions. Oversaw the on-boarding process for new hires.

✪ Successfully expanded a team of 3 software engineers into a team of 20.
✪ Formulated and established team policies and software tools to optimize communication and remote work.
✪ Designed a high reliability asynchronous API architecture supporting millions of requests per second.

## Octagon Commerce
### Senior Software Engineer
October 2011 - August 2013 (1 year 11 months)
Miami-Fort Lauderdale Area

✪ Spearheaded software projects, as well as front-end and back-end engineering projects.
✪ Developed user facing features and internal apps.
✪ Debugged and fixed live production code, and refactored legacy code.
✪ Presented research projects to the team to promote the incorporation of cutting edge techniques.
✪ Earned recognition for designing a fault tolerant service oriented architecture framework, as well as a service oriented framework with asynchronous message passing and message delivery reliability.

## US Self Storage Locator
### Founding Engineer
2010 - October 2011 (1 year)
Miami-Fort Lauderdale Area

✪ Drove marketing efforts and provided strategic direction for the startup company.
✪ Created a platform for administrators, site owners, and users to optimize their search efforts.
✪ Successfully architected an application framework from the ground up.

✪ Designed and built a SAAS platform for self storage marketing, searches, and bookings.

### Grey Robot, Inc.
Founding Engineer
January 2009 - March 2011 (2 years 3 months)
Miami-Fort Lauderdale Area

✪ Developed multiple cross-functional apps for businesses.
✪ Delivered quality support in website and web app development to small businesses and professionals.
✪ Performed devops duties and automation.
✪ Developed a customizable and theme-able open source CMS system for reuse in all web app projects.

### Rumbum, LLC
Web Developer
September 2009 - June 2010 (10 months)
Miami

Maintained responsibility for back-end and front-end web development.

### Port of Everglades
IT Technician
2007 - 2008 (1 year)
Miami-Fort Lauderdale Area

✪ Developed a mobile app for tracking ingress and egress of truck drivers in the port yard as an improvement of a paper based workflow.
✪ Provided IT support for the administrative office in the port.
✪ Ran and installed ethernet cabling, solar powered WIFI access points in key location in the port yard, and troubleshooted computer and various device issues.
✪ Installed an asset management system and registered
all office assets.

### LTC Global
Systems Administrator
May 2006 - August 2007 (1 year 4 months)

✪ Install and maintain office network and workstations.
✪ Provide IT support to staff.

### Intechcenter
IT Field Technician

January 2005 - January 2006 (1 year 1 month)

Maintained responsibility for the areas of:

✪ Technical support
✪ Consulting
✪ Network/systems administration
✪ Network planning and implementation
✪ Built PCs and servers
✪ Executed IT responsibilities for multiple private and commercial clients

## Education

### Palm Beach State College

· (2007 - 2010)

### Valencia College

· (2005 - 2006)
